

Connect Applications and Automate Business Processes

Complete Integration Platform for Acumatica Partners and Customers

Fast, Easy, Complete Build Integrations Quickly and Efficiently

The right data in the right place at the right time

Eliminate manual data entry, data exports, costly errors, delays, and processes managed with spreadsheets and email. Celigo's platform enables visibility across the organization—with fewer technical resources.

Intuitive

Built for both ecommerce managers and IT/operation

Flexible

Complete control with no code or advanced custom code options

Scalable

Supports hundreds, thousands, or millions of orders a day

Complete

Comprehensive, turnkey Acumatica integrations

Prebuilt Integrations

Save time with prebuilt integration templates for popular applications to get you up and running quickly.

Custom Integrations

Build custom integrations from scratch between any two applications with Webhook, HTTP, REST API, and FTP

Marketplace

Checkout our robust selection of prebuilt integrations between the most popular cloud-based applications

- On-premise agents
- Scripts (with Javascript)
- Hooks
- Wrappers
- API tokens
- Debuggers

Integrator.io by Celigo

Get started with a *free* integrator.io flow at celigo.com

Flexible, Proven, Reliable Customize and Expand

Focus on your business, not maintaining integrations

As companies grow and processes change, Celigo's integrator.io iPaaS allows both technical professionals and business users to automate, customize, and expand integrations as needed—so they can focus on their core business.

Guided User Interface

Step-by-step wizard with API adaptors, visual field mapping, drop-down menus, and other tools for no-coding integration

Advanced Developer Tools

Advanced tools for creating and sharing stacks, generating tokens for direct API calls, building wrappers, and more

Prebuilt Connectors & Templates

Accelerate with prebuilt connectors to hundreds of applications and prepackaged integration flows to popular applications to jumpstart integrations

Actionable Dashboard

Full visibility to monitor, manage, and update integrations with access to error details and ability to re-run integrations

Complex Orchestrations

Support complex processes by integrating multiple apps and data sources as part of single integration flow

Universal Adaptors

Connect with any application or data source using adaptors for REST/JSON, XML, FTP, AS2, EDI, SQL, web hooks, on-prem and more

The screenshot displays the Celigo integrator.io interface. The top navigation bar includes 'HOME', 'TOOLS & RESOURCES', 'MARKETPLACE', and 'SUPPORT'. The main area is titled 'My Integrations' and shows a grid of connector cards. Each card includes a success status, connector name (e.g., 'Shopify - Acumatica Connector'), and a 'SmartConnector' button. A detailed view of a specific integration is shown on the right, titled 'Sync Acumatica Items with Shopify + Amazon'. This view includes a visual flow diagram with 'SOURCE APPLICATIONS' (Acumatica) and 'DESTINATION & LOOKUP APPLICATIONS' (Shopify, Amazon). Below the diagram is a table of connections:

Connection Name	Type	API	Queue Size	Actions
Celigo FTP	FTP	Sandbox FTP to Production	0	[Dropdown]
Skubana	REST API	http://demo.skubana.co/service/v1	0	[Dropdown]

Prebuilt integrations available on the Celigo Marketplace

Common Integration Use Cases

- Lead to Subscription
- Procure-to-pay / Purchasing
- Warehouse-to-3PL
- Catalog & Listings / Merchandising

- Issue to Resolution
- Services Provisioning
- Order-to-Cash
- Inventory & Replenishment
- Payment-to-Reconciliation
- Hire-to-Retire
- Collaboration
- Reporting & Analytics
- Office Productivity

The vision of Celigo is to make automation as simple as possible by enabling anyone in the enterprise to build or deploy integrations.

“

We built a rich, multi-cloud API integration with Celigo for our client Kevins Worldwide so they can scale their business. If they want to switch to another ecommerce platform, we can implement that easily with less development or nocode development.

—Harsha Sarjapur, Acumatica Partner/MVP, InfoSourcing Inc.

We do fairly complex orchestrations with Celigo. We pull data from other systems to perform more sophisticated accounting computations. So when we say we take transactions all the way to the finish line, we definitely can do that now with Celigo.

—Jotham Ty CEO, Gappify

Gappify

“

I found it to be very user friendly and any tweaks or changes that I've had to make have been very easy and the errors are very clear. When you run into an issue its very easy to tell what the problem was.

—Craig Matusinski, Ecommerce Director, Kevin's Worldwide
