sage 100cloud

FEATURE SUMMARY

eInvoicing

for Sage 100cloud

Get paid faster and simplify account reconciliation

Increase payment velocity, save time on processing, and increase customer loyalty with self-service payment options for Sage 100cloud.

Click-to-Pay

The easier you make it for your customers to pay, the faster they'll do it, and the better they will feel about the experience.

Send emails with a payment link and pdf invoice to customers so that they can pay online via credit card or ACH. With click-to-pay, businesses can expect increased cashflow through faster payments.

Gain a competitive edge by providing your business customers with the same level of service they have come to expect as consumers.

Customer Portal

Do your customers call with questions about outstanding payments, past invoices, and payment options?

Benefits

- Click-to-pay email, with PDF invoice, featuring a link to pay online

- Updates of Sage 100cloud A/R and general ledger accounts

- eInvoice integrations in A/R, sales order, and job cost billing modules

- Secure storage of Credit card and ACH information for future payments

- Secure customer web portal for invoice and sales order payments

- User-friendly business web portal to manage customer payments, configurations, sales orders, and invoice payments

Are customer requests costing you time and invonveniencing your customers?

Businesses increasingly expect anywhere, anytime access to the information they need to run their business. With the Sage 100cloud payments portal powered by Paya, you can provide your customers with the secure and intuitive self-service payment experience they expect.
